

Medical Aesthetics & Facial Acupuncture

When we look forward to the future, the one thing we can be certain of is that we will get older. While we age outwardly, though, we don't feel any different on the inside. While we may prefer the benefits that come with age, such as wisdom, many of us perceive that physically speaking, youth is beautiful and would like to stay looking a little younger as we get wiser!!

Well thanks to the use of dermal fillers and muscle relaxant treatments, we have a chance to slow down the outward signs of ageing and have

the best of both worlds....where our future is beautiful in both respects!

Our skin, over time, changes structure to become less elastic and flexible. This causes muscles to sag and creases, wrinkles and lines to form. These changes can affect the way that our skin appears and feels on our face.

Ageing is a natural process. However, many people seek ways to help them to look good and feel great at an older age. The resources to make this become a reality have become more widely available, are safe and very cost effective compared to cosmetic surgery.

WalkWell Aesthetics helps you to achieve this by providing high quality services which are tailored to meet your cosmetic needs.

Muscle Relaxants

The objective of Botulinum treatment is to help prevent the facial muscles that create lines from being used, and so, stop the lines from developing.

Botulinum toxin contains natural proteins that originate from bacteria. These proteins are purified to become a safe and highly effective product which can temporarily relax the muscles. For facial treatments, a very small amount of the product is injected into the muscles that create facial dynamic lines.

Botulinum toxin temporarily prevents the nerve signals from reaching and communicating with the muscles which cause movement, thus relaxing the area, reducing the signs of ageing and smoothing out the lines and wrinkles. Anyone aged 25- 65 years is able to benefit from muscle relaxant treatments.

The results

Softening of the line by preventing movement of the dynamic facial muscles to sustain a relaxed and youthful look.

Prices for muscle relaxant treatments:

Per appointment:

1 area	£189
2 areas	£ 239
3 areas	£299

Dermal Fillers

Young skin contains higher levels of hyaluronic acid (HA) which is a substance that binds water to hydrate the skin and promotes the softness and fullness that we associate with young looking skin. As we age, the HA gradually reduces and becomes less efficient, leaving us with the evidence of maturity. As lines and wrinkles develop we can feel less confident and sense that our youth is far behind. The objective of dermal fillers is to help replenish lost HA in the skin. Our

skin contains about 50% of the total HA in our bodies. HA is very safe and efficient. Dermal fillers that contain HA are temporary and biodegradable products which can last up to six months. There are several different brand names for dermal fillers and Walkwell Aesthetics uses a product called Restylane to help improve the appearance of lines, wrinkles and folds.

The results.

- Restoration of a youthful look in less than one hour
- No allergy test is needed
- Results are immediate
- Recovery time is short
- Skin feels soft
- Skin appears more natural
- Treatment is easy and convenient
- Treatment is effective and safe
- There is a high patient satisfaction rate with the results.

Unfortunately our skin will continue to age, so in order to keep the youthful and restored look, treatment needs to be continued.

Prices

Per appointment:

0.5ml	£205
1.0ml	£295

Facial Enhancement Acupuncture

This type of acupuncture focuses on minimising the signs of ageing, and like many other forms of acupuncture has been practiced for thousands of years, particularly for Empresses and Court ladies in China.

Needles are placed in the arms and legs as well as the face. From the treatments you will notice that, fine lines and wrinkles may reduce, jowls become firmer and the general appearance of the skin improves.

This type of acupuncture also helps with scarring.

Benefits can be felt after just one treatment, however more significant effect is noticed after a course of 10 to 12 weekly treatments, after which monthly maintenance treatments will help maintain the benefits.

Prices

Per appointment:

1 hours session	£65
-----------------	-----

A block booking of 10 treatments £600
